PROFESSIONAL SUMMARY

Curious Computer Science (Cybersecurity) student who enjoys learning new tools and explaining technical problems clearly. Combines customer-facing campus IT support with independent security labs, persistence, and a collaborative approach to problem-solving.

EDUCATION

Arizona State University Aug 2023 – Dec 2027 (Expected)
B.S. Computer Science (Cybersecurity) *Tempe, AZ*

- **Honors:** Dean's List; New American University Scholar.
- **Coursework:** Information Assurance, Computer Network Security, Computer and Network Forensics, Data Structures & Algorithms.

PROFESSIONAL EXPERIENCE

Arizona State University Mar 2025 – Present
Technology Consultant *Phoenix, AZ*

- Support 100+ users weekly with Windows and macOS issues; clarify reported problems, troubleshoot systematically, and explain next steps in accessible language.
- Document recurring issues and troubleshooting steps for consistent team handoffs and knowledge sharing; automate classroom workflows with Python, reducing manual work by over 20%.
- Deploy and manage AWS EC2 instances, improving system efficiency by 25% while balancing support requests and technical tasks.
- **ASU SUN Award (Oct. 2026):** Recognized for exemplary service, leadership, and initiative in supporting university operations.

Orion Tech May 2024 – Jul 2024
Application Security Developer Intern *Remote*

- Secured backend APIs with OAuth 2.0, JWT authentication, and role-based access controls to restrict sensitive actions.
- Strengthened input validation against SQL injection and cross-site scripting (XSS); tested application flows using Burp Suite.
- Developed audit logging and monitoring workflows to improve event traceability, evidence review, and security investigations.

TECHNICAL SKILLS

Security Operations: Wazuh SIEM, Log Analysis, Alert Triage, IOC Investigation, Windows Event Logs, MITRE ATT&CK

Risk & Controls: Access Control, Audit Logging, Security Documentation, Vulnerability Assessment, OWASP Top 10

Security Tools: Wireshark, Nmap, Burp Suite, AbuseIPDB

Programming: Python, Java, JavaScript, C/C++, SQL, Swift

Systems & Cloud: Linux, Windows, WSL2, AWS EC2, Git, Flask, Networking

CYBERSECURITY PROJECTS

OpenSOC Lab – Wazuh SIEM Home Lab 2026

- Deployed Wazuh manager, indexer, Filebeat, and dashboard on Ubuntu WSL2 for centralized endpoint event collection and security monitoring.
- Connected a Windows 11 agent, verified telemetry ingestion, and examined host events to practice investigation and endpoint activity analysis.

ThreatLens V2 – Security Log Analysis Platform 2026

- Built a Python/Flask pipeline to normalize SSH, web, and Windows process/Sysmon events and detect suspicious behavior with modular rules.
- Correlated account compromise, suspicious execution, and ransomware-like activity; a 22-event case produced 3 findings and 1 critical incident.
- Enriched findings with MITRE ATT&CK and AbuseIPDB, generated PDF/CSV investigation reports, and passed 30 automated tests.

Web Application Security Scanner 2026

- Developed a Python scanner using requests and BeautifulSoup to assess SQL injection and XSS risks across 50+ extracted input fields.
- Produced severity-ranked vulnerability reports to support remediation prioritization, reducing manual testing effort by approximately 40%.

CERTIFICATIONS & HANDS-ON TRAINING

- **pwn.college Orange Belt:** Completed 183 hands-on challenges across seven cybersecurity modules.
- **Google Foundations of Cybersecurity:** Completed foundational security training through Coursera.
- **CompTIA Security+:** In progress; studying threats, identity management, security controls, and risk.
- **Security Labs:** TryHackMe, Hack The Box, Let's Defend, CyberDefenders.
